PowerLock PL-700

The **PL-700** padlock offers an exceptional level of security and durability for high-risk applications. Here's a detailed overview of its specifications and advantages:

Specifications:

Material:
- Body: Made from case-hardened stainless steel, giving it high durability and resistance to both physical attacks and
- environmental factors.
- Shackle: Constructed from case-hardened boron steel with a 14 mm diameter — highly resistant to cutting and other physical attacks.
- Finish: Supplied in a stylish matte finish for a professional appearance.

Security Features:
- Locking Mechanism: Includes the PowerLock Pro cylinder, which uses 12 stainless steel discs for advanced pick resistance.
- Key Retention: The key can only be removed when the lock is in the locked position, ensuring secure use and
- preventing accidental unlocking.
- Dual Locking Shackle: Hardened stainless steel balls lock the shackle on both sides, providing excellent protection against forced entry.

Environmental Resistance:
- Corrosion Tested: Successfully tested with acetic acid salt spray, making it ideal for outdoor use and harsh environments.

Certifications:
- Certified to BS EN12320 Security Grade 5+, providing peace of mind that it meets high standards for resistance to tampering, cutting, and pulling attacks.
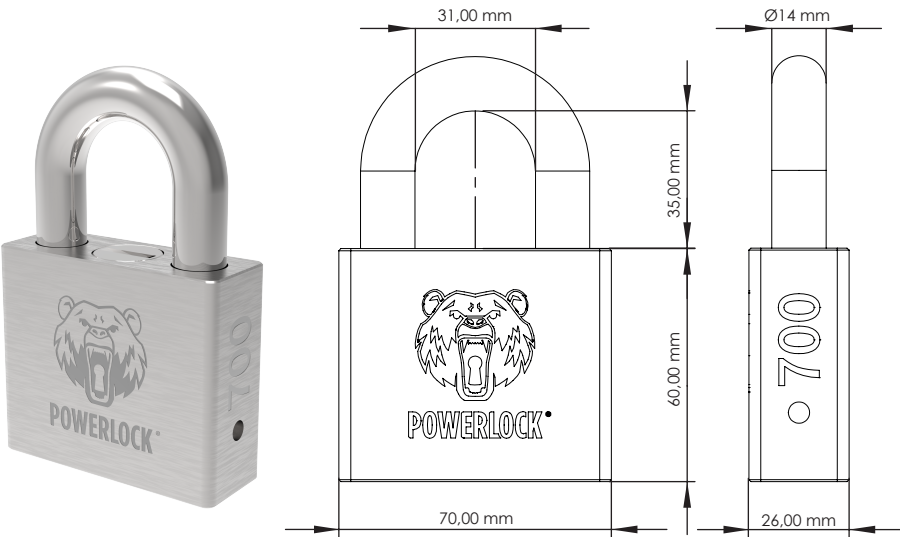

Accessories:
- Includes 2 stainless steel keys.
- Comes with a 2-year warranty for added assurance.

Advantages:
- Full Stainless Steel Construction: Provides maximum durability, corrosion resistance, and security.
- CEN 5+ Certification: Meets high European standards for security, ideal for maximum-security applications.
- Removable Shackle: Offers flexibility in use, allowing easy installation and removal when necessary.
- Versatile Applications: Suitable for securing shipping containers, railway wagons, trucks, warehouses, and other high-value assets that require maximum protection.

The **PL-700** padlock is an excellent choice for securing high-value items in demanding environments, thanks to its robust construction, advanced locking mechanism, and weather-resistant properties. With its removable shackle and compliance with stringent security standards, it is designed to perform reliably under the most challenging conditions.

Technical data	
Key system	PowerLock Pro
Body	Made of stainless steel, case hardened, matte finish
Body size	70 x 26 x 60mm (width x thickness x height)
Shackle	Diameter 14mm, height 35mm, material: polished stainless steel
Security grading: EN 12320:2012	CEN grade 5+
Weight	0,85 kg
